Full-featured
Control Panel

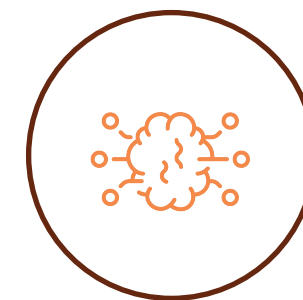

FEATURES

PROMPT Library

Improved Efficiency and Speed

Eliminates the need for the user to input the same basic information. This saves time and streamlines workflows, especially in repetitive tasks

Consistency and Accuracy

Ensure consistent input, minimizing

Enhanced User Experience

Users can focus on providing specific details rather than repeatedly creating prompt

Control and Guidance

Provide the necessary information in the correct format, improving the quality of data collected

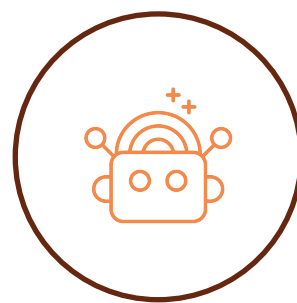

FEATURES

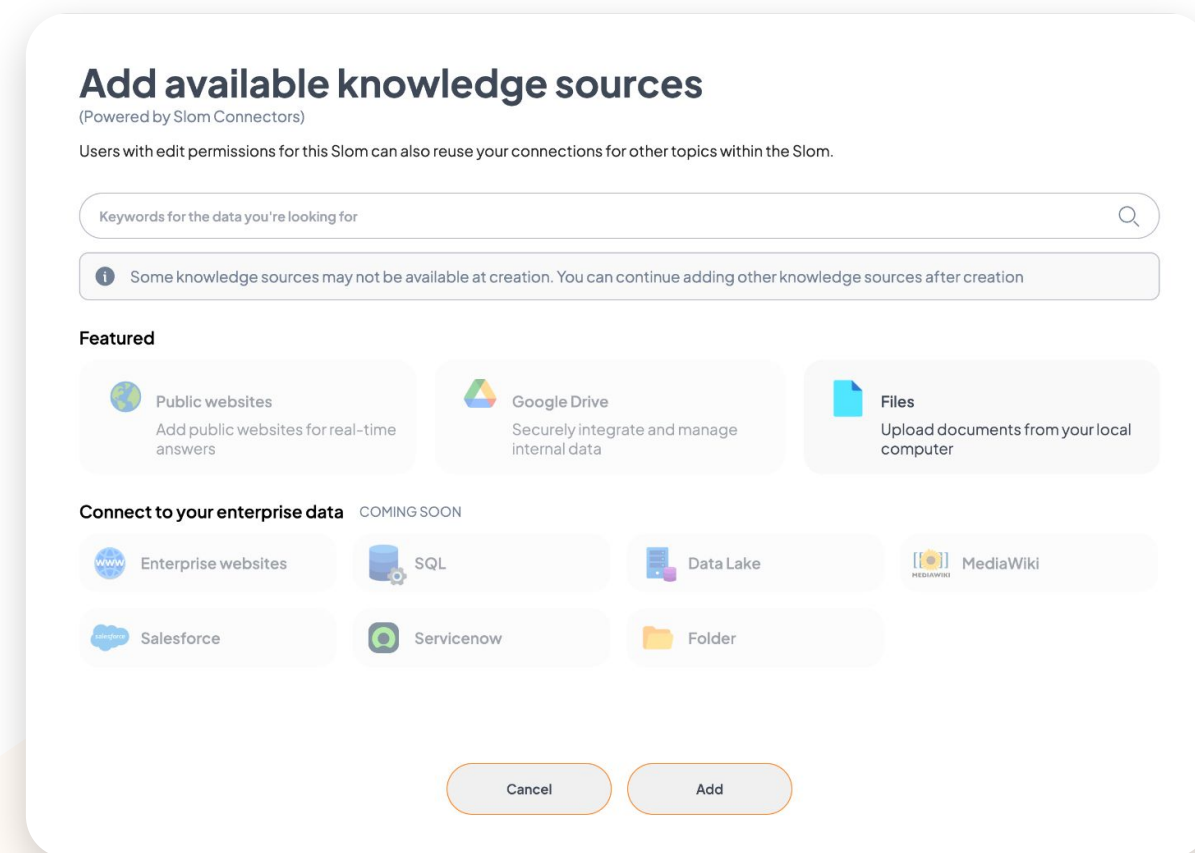

Create Your OWN AGENT

The agent is designed to **provide tailored information** for users within the organization

Integrates data from a large language model (LLM) alongside specific organizational resources, such as the sales deck, staff handbook, company website etc

Create own tools and workforce for organization

Techie

Techie is your go-to tech support guru. It assists users with troubleshooting and solving common technical issues related to computers, smartphones, software, and other gadgets. Techie is knowledgeable about a wide range of technology topics and can guide users through step-by-step solutions to their tech problems.

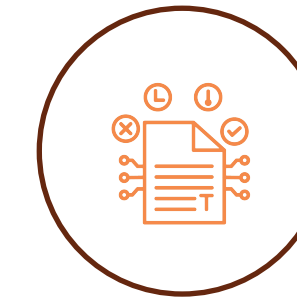

Finance Advisor

FinanceFriend helps users manage their personal finances, offering advice on budgeting, saving, investing, and understanding financial concepts.

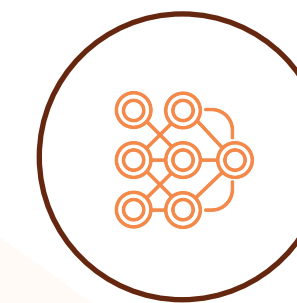

HR

HR Staff handbook outlines the organization's procedures, rules, and regulations. It also serves as a resource for staff to find answers to HR-related questions.

Assign users to agents to control and manage information flow within the company

Streamline office administration by developing tools like expense claim and leave applications
